Create And Sell

PRINT-ON-DEMAND (POD) PLATFORM

Custom Products

T-Planet is a print-on-demand (POD) platform that allows individuals and businesses to create and sell custom-designed products without having to handle inventory or production. The platform connects users with a network of printing partners who handle the printing, packaging, and shipping of the

products.

*About Project

T-Planet enables entrepreneurs and designers to start their own online businesses with minimal upfront costs and inventory management. It has gained popularity as a way for individuals to enter the e-commerce space without the need for significant investments in manufacturing and warehousing. Keep in mind that the specific features and offerings of Printify may evolve, so it's a good idea to check their website or contact them for the most up-to-date information.

Challenges The biggest challenge was that the client's wanted to make more than one store for each

acount so that he could collect all his stores in one account. The client's wants the website to be directed only to the country of Pakistan, so I must know

the nature of the user in this country to create a site that is easy to use for them

Problems & Solutions

Finding a way to help the user find all the

information he needs, including payments, purchases, and everything.

Problems

- The client's has no idea about design system (colors, fonts, buttons and logo).
- The site was directed to a country where I had no idea about their nature and the nature of their lives, so it was difficult to know the best way for the user to feel comfortable during use.

We have created pages that help the user see all the information he needs

Solutions

and switch between curtains in a very simple and passive way. It would have been better, before

starting anything, to understand the

- nature of the site, search, and communicate with the client's.
 - best way that made us provide a complete product in a way that suits the country of Pakistan.

Research and communication were the
